HRFE/PARIS ISSUES ADDRESSED IN 16.2 RELEASE

1560: SEP: Historical SEPs show incorrect negative unit value (-1) for new OBBBA Comp Time buckets

Historical SEPs show an incorrect negative unit value (-1) for the new OBBBA comp time buckets.
The issue is that any transactions that were started and completed (as in the case of Historical SEPs) before we pushed v16.0 on 11/12/2026 will not have the transactional properties needed for the OBBBA “buckets” logic. In those cases, default values for the missing properties are set to -1. This may cause values to appear negative on the SEP tab.
