

## HRFE ISSUES ADDRESSED IN THE 14.1 PATCH

### **1526 - C: Increase MM/D field should allow single- and/or double-digits**

With the HRFE 13.5 release in Fall 2024, we implemented stricter requirements on date fields in HRFE. Part of that change was for ReQtest bug #1109 to disallow extra characters beyond MM/DD in the "Increase MM/DD" field. That release also now required that the Increase MM/DD field be formatted as double digits with leading zeros.

However, Banner allows single digits in the "Increase MM and DD" field resulting in additional work for the users when a HRFE transaction is processed for an employee with single digits in that field.
